

Apishield FAQ

We've had some queries about the use of ApiShield to combat the Asian hornet – here's a brand new [ApiShield FAQ](#).

Pollen-rich Diets

Research has confirmed the importance of pollen-rich diets for honey bees. A good diet even [helps combat the worst effects of varroa](#). And [VitaFeed Nutri](#) is designed to boost your bees with high quality pollen protein!

**NO POLLEN?
NO PROBLEM.**

Stimulate egg laying, increase brood area and boost adult bee population with the new GMO-free feed from Vita (Europe) Ltd.

INTRODUCING A NEW FEED FROM VITA

HORNET & WASP TRAP
PROTECT YOUR BEES
FROM ATTACK

Read a summary of the paper based on knowledge of the hornet's spread in France

USA Total Eclipse

In the USA, a total eclipse of the sun took bees by surprise in August. How did they react? We have linked to [a couple of bees-in-an-eclipse videos](#).

We have new handles on [Twitter](#) and [Facebook](#) this month – look out for VitaBeeHealth on both. All will become clear as we celebrate our 20th anniversary at [Apimondia](#) in Turkey at the end of September. Please call by our stand if you are there.

Photo Competition

And don't forget to enter the [Vita Calendar Photo Competition](#).

Best wishes
